

Peer Review

Review of: "Universal Wong Formula for Capture Cross Sections from Light to Super-Heavy Systems"

Surjit Mukherjee¹

1. Brno University of Technology, Czech Republic

Final Remark on Reviewed Research Paper:

Comprehensive Response: The author has meticulously addressed all queries raised during the review process, demonstrating a profound understanding of the subject matter. Each response provided by the author is clear, concise, and directly addresses the concerns raised, leaving no ambiguity regarding the validity of their arguments.

Depth of Understanding: The depth of the author's understanding is evident in their response, as they not only provide satisfactory answers but also offer additional insights, enriching the paper's content. The author's responses reflect an understanding of their research methodology and findings, instilling confidence in the paper's credibility.

Recommendation for Publication: Based on the author's adept handling of the review queries, it is recommended that the paper be accepted for publication, as it contributes significantly to the field and upholds the standards of scholarly research.
