Live Attenuated Measles Virus Vaccine

National Cancer Institute

Source

National Cancer Institute. *Live Attenuated Measles Virus Vaccine*. NCI Thesaurus. Code C82651.

A live, attenuated measles vaccine with potential antineoplastic activity. Upon subcutaneous administration, live attenuated measles virus vaccine may activate the immune system to mount a cytotoxic T-lymphocyte (CTL) response against measles-positive tumor cells. Measles virus has been shown to be present in some non-small cell lung cancers.
