Potential competing interests: No potential competing interests to declare.

1. Provide the accession number of the plant.
2. Rewrite the statistical analysis using different p-values.
3. There is no graph or table related to the antioxidant assay. Cross-check them.
4. Split the 2D interaction diagram and make a separate table for hydrogen and hydrophobic bond interactions.
5. Show the 3D binding pocket of the ligand-protein interaction in visualization tools.
6. Correct grammatical and syntax errors.
