Review

Digital Mapping of Resilience and Academic Skills in the Perspective of Society 5.0 for Higher Education Level Students

Check "adversity or adversity" on 6 paragraph in the introduction section please check and amend.

The Introduction part incorporates an extended literature review, and at the same time Literature review section has exhaustive literature review. It would have been better to put all the literature review under Literature Review section, and focus on the introduction of the subject in the Introduction section.

The discussion presented in the Literature section is more of introduction. Better to put the introduction part in the previous section under Introduction section.
