Potential competing interests: No potential competing interests to declare.

Clarity in Methodology: The abstract outlines the utilization of the EnergyPLAN model for assessing various parameters. To enhance the manuscript's clarity, could you provide a brief overview of the key inputs and assumptions considered in the EnergyPLAN model? This would offer readers a clearer understanding of the modeling approach.

Practical Implications: The findings regarding the impact of district heating and energy efficiency measures are crucial. To strengthen the manuscript's practical relevance, could you elaborate on potential practical implications or applications of these findings? Additionally, are there specific recommendations for policymakers or practitioners based on the observed effects on primary energy supply savings and CO2 emissions?
