Review of: "Dynamic and Power-Quality Impacts of High Photovoltaic Penetration on Distribution Feeders That Static Load-Flow Studies Overlook"

Zedequias Machado Alves[1]

1. Federal Institute of Santa Catarina, IFSC, Florianópolis, Brazil

Congratulations to the authors on this paper. Studying the impacts of distributed energy resources (DERs) on distribution systems while considering both DER and system dynamics is a topic underrepresented in the literature that warrants further in-depth investigation.
