Review of: "FLAML-Boosted XGBoost Model for Autism Diagnosis: A Comprehensive Performance Evaluation"

Celestine Iwendi[1]

1 Institute of Electrical and Electronics Engineers (IEEE)

The following should be noted and corrected accordingly:

1. How practicable is your proposed model in real-time?

2. Is it cost-efficient?

3. Grammar requires minor re-editing

4. What are the limitations of the study?

5. The Introduction should contain the organisation of the study

6. Section 2 should be titled "Literature Review" or "Related Work"

7. What is the future scope of the study?

8. Consider this related paper "A Comparative Recognition Research on Excretory Organism in Medical Applications Using Artificial Neural Networks" for better comprehension
