

Review of: "Economics of Cattle Fattening - A Case of Bangladesh"

Haile Girma

Potential competing interests: No potential competing interests to declare.

The abstract should be revised. In abstract we commonly discuss the purpose, problem statement, methodology, finding and recommendations. Thus, the first four statements should be removed. I thoroughly went through the main text of the manuscript and found that it is well organized. But, I am not comfortable with recommendation part. It should be revised: first explain the problem which is found in study area. Then explain how the problems will solved and responsible body to solve it/them. Recommendation must actionable/feasible
