## Comments to the authors

- 1-The physical properties (such as color and melting point) of the new derivatives should be listed
- 2- The authors must talk in introduction with details about other Schiff base derive Sefradine, with focus on the results of the biological activity of these derivatives.
- 3- In biological part MIC-study should be done to obtain of typical results.
- 4-The supplementary data such as figures of IR, H-NMR, C-NMR must be inserted inside the manuscript.
- 5- The frequency of carboxylic C=O group must be sharp not in wide range In the table of IR data
- 6- The systematic nomenclature of each derivative must be written before its number.
