Potential competing interests: No potential competing interests to declare.

**This is an interesting study and the authors have collected a unique dataset using cutting edge methodology. The paper is generally well written and structured. However, in my opinion the paper has some shortcomings in regards to some data analyses and discussions, and I feel this unique dataset has not been utilized to its full extent in the discussion part.**

**As suggested above, I think a more in-depth discussion would be helpful. I feel this is a significant result for this research, and therefore it merits more discussion.**

**The author may wish to mention why the research is important in the present scenario.**

**Overall the information presented represents valuable information regarding the Online learning.**
