Comments to author

1- Consider these questions to provide a more insightful review. Also, remember that your review is public, so ensure it is well-crafted.

- Can you provide specific examples of where additional references would strengthen the text? Some paragraphs are so long with only one citation. Please increase the number of references in the text to be sufficient.
- Could you suggest specific sections or topics where the results and discussion should be increased?
- Molecular docking studies of Cox-2 inhibitors should be explained in detail in the review.
- Details of all Cox enzymes and their inhibitors, and different breast cancer therapies and medications.
