Enterobacter asburiae

National Cancer Institute

Source

National Cancer Institute. *Enterobacter asburiae*. NCI Thesaurus. Code C86358.

A species of facultatively anaerobic, Gram negative, rod shaped bacterium in the phylum Proteobacteria. This species is nonmotile, oxidase negative, ferments sucrose, hydrolyzes esculin and reduces nitrate. *E. asburiae* is endophytic in many plant species and an opportunistic pathogen in humans, causing community acquired pneumonia.
