The current paper is good enough to explore the Antioxidant Activity and α -Amylase Inhibitory Potential of Melilotus indicus Ethanolic Extract: An In Vitro and In Silico Study. Following are my suggestions:

1. The start of the abstract is non-scientific: "Building upon the long history of plants as natural remedies." This sentence has no subject, verb, etc. Rewrite it.
2. Explain the background and aims of your research in the first two lines.
3. The conclusion line is general, not solid?
4. The introduction only explains the importance of medicinal plants. Please explain the proper/specific significance with local and international importance, research gaps, the output of this research, and the need for the current research.
5. The objectives are not clear.
6. The methodology and results are good and satisfactory.
7. The rest of the paper is good.
8. References should be from recent papers.
