Potential competing interests: No potential competing interests to declare.

Overall, the article provides a comprehensive overview of the healthcare system in Bangladesh, highlighting its decentralized nature and the various challenges it faces. Here are some observations and suggestions for improvement:

Clarity and Structure: The abstract effectively summarizes the key points of the article, providing a clear roadmap for what the reader can expect. However, the introduction could be more concise to better set the stage for the discussion.

Evidence and Citations: The article would benefit from more direct citations to support the claims made. For instance, when discussing the challenges faced by the healthcare system, providing specific statistics or studies would enhance the credibility of the arguments presented.

COVID-19 Impact: The article appropriately addresses the impact of the COVID-19 pandemic on the healthcare system in Bangladesh. However, it could delve deeper into how the pandemic exacerbated existing challenges and provide more specific examples or case studies.

Solutions and Recommendations: The article offers a range of potential solutions to address the identified challenges, which is commendable. However, it would be beneficial to prioritize these solutions based on feasibility and potential impact, and provide more concrete strategies for implementation.

Language and Tone: The language used is formal and appropriate for an academic or policy-oriented audience. However, ensuring consistency in terminology and avoiding overly complex language would improve readability.

Conclusion: The conclusion effectively summarizes the main points discussed in the article. It reinforces the importance of proactive leadership and policy reform in addressing the healthcare challenges in Bangladesh. However, it could be strengthened by emphasizing the urgency of action and providing a call to arms for stakeholders.

Overall, the article provides a valuable contribution to the discourse on healthcare in Bangladesh and offers actionable recommendations for improvement. With some revisions to enhance clarity, evidence base, and specificity of recommendations, it could become an even more impactful resource for policymakers, researchers, and practitioners in the field.
