Overall, this is an interesting paper. I recommend following major changes.

1. Enrich the literature review in your work.
2. Highlight the innovative contributions of the proposed methodology in the Introduction Section.
3. Improve the overall organization of the paper.
4. Improve the comprehension of the discussion related to the proposed controller design.
5. Include a concise quantitative and qualitative comparative analysis of the simulation results.
6. Check for grammatical and spelling mistakes.
