Potential competing interests: No potential competing interests to declare.

I would recommend this research on its interesting and meaningful topic, especially on the context of Africa environment. however, some parts still need to be improved and strengthened as following:

1 In section 4, the reasons that 15 tourists and five staff members were chosen need to be illustrated. Does the information get a saturation with these 20 respondents?

2 More evidence are welcomed to indicate the activities and their impacts in Section 5.

3 Strategies to minimize the negative impacts of tourist activities need a more description in detail. The current description seems weak to address the negative impacts.

4 I recommend to interview more groups, such as researchers on the cave heritage, tour guide on this site, for a thorough and efficient strategies.
