Dear author (s), I truly value your efforts, the analysis conducted and pleased to evaluate your study.

I would like to offer some comments to enhance the constructiveness of your research.

1. Not clearly prescribed the importance of stating the paper's main purpose and problem in the abstract.
2. It would be appropriate to include standard sections such as introduction, methods, results, discussion, and conclusions.
3. The literature review needs to be more complete and relevant. Use the research database Scopus and Web of Science.
4. The paper should explore deeper into the investigation of outsourcing methods.
5. The data is out of date. (the presented table illustrates the impact of outsourcing on the industrial sector in Spain during the period spanning from 1986 to 1994).
6. A discussion and conclusion section should be added to provide a comprehensive wrap-up of the research and its findings.

All the best, LB
