This research paper is neither extraordinary nor ordinary writing. I found the author stating the obvious and not offering anything different from what is available in the existing knowledge domain. The hits and misses of the Indian National Congress, as the paper suggests, are quite known to readers of electoral politics in India. It would have been interesting to know what the hits and misses of the Indian National Congress mean for electoral democracy in India. Moreover, it will also be interesting to explore the role of the Congress party (read Congress Party's Alliance) in strengthening the electoral performances of other political parties such as the Samajwadi Party, the Shiv Sena (UBT), the NCP in Maharashtra, etc. In that sense, whether helping the alliance political parties perform better is a hit or miss of the Congress can be explored.
