

Review of: "EEG-based Emotion Classification using Deep Learning: Approaches, Trends and Bibliometrics"

Alejandra Andrea Segura Navarrete¹

¹ Universidad del Bío-Bío

Potential competing interests: No potential competing interests to declare.

The work presents a good bibliographic review, but no robust discussions are provided. Questions must be answered, such as:

what algorithms are the most used?,

what algorithms provide the best results?,

what type of dataset do they use?, etc.

The conclusions do not represent the review work.
