

Review of: "[Commentary] SBRT (Stereotactic Body Radiotherapy) in Recurrent Head Neck Cancer - Boon or Bane?"

Protopapa Maria

Potential competing interests: No potential competing interests to declare.

The review is a synopsis of existing literature and guidelines on the subject of head and neck reirradiation. It is well written and presented. Comparison of SBRT to conventional RT concerning indications, results and toxicity in the setting of head and neck reirradiation would have added much value to this review.
