Potential competing interests: No potential competing interests to declare.

Description of Fig 1-30 is missing in this paper.

Similarly, a description of Table 1-8 should be added to the paper.

All Figures and Tables should be cited in the text of the paper.

There should be at least a 3-5 line description about each figure.

The objective of this paper is of high interest.

Please incorporate the following compartmentalization within the abstract:

Objectives: In <30 words. Methods/Statistical analysis: It should be <70 words. Include the method adapted to study the objectives, sampling details, or simulation, and the statistical analysis of data; the technique employed; and mention unique/important points of modification of the methodology in the current study. Mention details about the test samples and the control employed, or the approach used for comparing the test sample. Findings: It should be <170 words. Mention your findings in the form of statements along with the conclusive data of statistical importance; mention how your findings are unique and novel; how your findings are in consensus with the existing values/reports or how different they are from the already reported findings. Highlight how your results are helpful in adding more value to the existing reports. Application/Improvements: In <30 words.

The contribution of your work and the organization of the paper should be included at the end of the introduction part.

The author needs to include all the missing values of the references, like the page number, volume number, issue number, etc.
