# Immunoglobulin A Deficiency 1

National Cancer Institute

## Source

National Cancer Institute. *Immunoglobulin A Deficiency 1*. NCI Thesaurus. Code C123434.

Decreased or absent levels of serum immunoglobulin A, with normal serum levels of immunoglobulin G and immunoglobulin M in a patient who is older than 4 years of age and in whom all other causes of hypogammaglobulinemia have been excluded. Affected individuals may be asymptomatic or have frequent infections, allergic reactions, or autoimmune disorders.
