

Review of: "A Mini-Review On MXene Based Textiles For Electromagnetic Interference Shielding Application"

KRISHNAPRIYA S

Potential competing interests: The author(s) declared that no potential competing interests exist.

Manuscript is well documented. The following major changes should be incorporated before considering for publication.

1. Equations are not numbered properly.
2. Some of the parameters used in the equation of Attenuation, A and Reflection loss, R are not mentioned in text.
3. The two references given under materials, i.e. 14 and 15 for shielding are not sufficient. Include more used references.
4. Check the unit of conductivity shown as 5 Ohm/Sq which is wrong.
5. Reference is missing for the synthesized cotton textile by Zheng et.al.
6. Any general inference based on Table 1 results could be included.
