Pancreatic Neuroendocrine Tumor pT1 TNM Finding v8

National Cancer Institute

Source

National Cancer Institute. *Pancreatic Neuroendocrine Tumor pT1 TNM Finding v8*. NCI Thesaurus. Code C135552.

Pancreatic neuroendocrine tumor limited to the pancreas and measuring less than 2 cm. Limited to the pancreas means there is no invasion of adjacent organs (stomach, spleen, colon, adrenal gland) or the wall of large vessels (celiac axis or the superior mesenteric artery). Extension of tumor into peripancreatic adipose tissue is not a basis for staging. (from AJCC 8th Ed.)
