This working paper, titled *A Review of Transformation and Digital Literacy for Sustainable Development in the Greater Mekong Subregion*, presents a compelling examination of its subject. The abstract serves as a strong summary, effectively outlining the core themes, objectives, and potential impact of the paper. However, it is crucial to ensure that the content of the review delivers on the promises articulated in the abstract.

If the paper includes specific research findings or conclusions, incorporating appropriate citations will enhance its credibility by substantiating claims with evidence. Furthermore, while the paper emphasizes the significance of transformation and digital literacy, it would be advantageous to provide actionable recommendations. These could guide policymakers, stakeholders, and practitioners in the Greater Mekong Subregion (GMS) as they work to implement sustainable development initiatives. Clear, practical insights would not only strengthen the paper's impact but also offer tangible value to those striving to effect change in the region.
