Revised International Prognostic Scoring System

National Cancer Institute

Source

National Cancer Institute. *Revised International Prognostic Scoring System*. NCI Thesaurus. Code C162677.

A revision of the International Prognostic Scoring System for Myelodysplastic Syndromes. It covers the same disease factors as the IPSS, but the factors are identified in a more detailed way. The revised version includes: blasts in the bone marrow, cytogenetic abnormalities, hemoglobin level, absolute neutrophil count, and platelet count.
