General assessment:

This paper discusses an important topic. I commend the authors for their work. While I had a good experience overall, I believe there's room for improvement in certain areas:

1. Title: "Sustainable Development Goals matters arising" was not clear
2. Abstract: I suggest including more details potentially highlighting some of the key policy gaps identified and their potential implications.
3. Introduction: Reads well but it lacks references. The explanation and figures presented need to be backed with evidence.
4. I would like to suggest adding a section before the Policy option that summarizes the policy gaps and their implications for achieving SDG. This will help in evaluating or linking the proposed key actions aimed at improving the nutrition of adolescent girls and women.
