Potential competing interests: No potential competing interests to declare.

- The manuscript lacks specific data or empirical evidence to support the statements made. Including references to relevant studies or reports would strengthen the arguments and increase the credibility of the information presented.
- The manuscript would benefit from a clearer structure and organization, making it easier for readers to follow the flow of information and understand the main points being made.
- The manuscript focuses primarily on the challenges and recommendations, but there is limited discussion on the outcomes or effectiveness of the suggested approaches.
