Reviewer of "Assessment of Urban Health Extension Package Utilization and Healthcare Seeking Behavior among Model and No model Households in Addis Ababa, Ethiopia: A Comparative Community Based Study." This is an interesting topic, and these are my comments

1. Health Extension Package Utilization and Healthcare Seeking Behavior in the urban community is not as much of a problem as you stated in the results section. I wish the study were in the rural community.

Your title is almost the same in this study; please justify it.
3. In the statement of problem, please explain the current problem and efforts to solve the problem.
4. In the Discussion section, you have used the same article repeatedly, so please cite a different study.

Dear author, you are doing well. This article is well written and has more strength. Thank you.
