INSERM. (1999). Orphanet: an online rare disease and orphan drug data base.

Pseudounicornuate uterus. ORPHA:180079

Pseudounicornuate uterus is a rare, non-syndromic uterovaginal malformation characterized by a crescent-shaped, small-sized uterus containing a single horn and fallopian tube associated with a rudimentary second horn (which can be solid or contain a cavity with functioning endometrium and be communicating or non-communicating). Urinary tract anomalies are frequently associated.
