Dear authors,

The article is interesting and has theoretical and practical value.

Critical comments: I do not quite agree with the placement of the 2.1.5.2 item in the Antioxidant Activity chapter (2.1.5).

Instead, the 2.1.5 chapter should be consistent with 2.1.3 and 2.1.5.1 to present antioxidant activity in both ways: antiradical activity and reducing power.

Yours sincerely,

Oksana Bocharova
