

# Review of: "Post-Publication Racism: A Nail in the Coffin of Academic Medical Publishing"

Chisaa Igbolekwu

**Potential competing interests:** No potential competing interests to declare.

In as much as I want to agree with the author that there may be pre and post publication racism and discriminations especially against authors from developing countries, I want to also emphasis the need for empirical evidence to back up these allegations.

There is need for a more comprehensive study backed up with scientifically collected data and analysis in order to further substantiate these claims.

The author's subjective arguments and observations is insufficient to establish the claims. There is also need for clear statement of methodology and analysis used in this study.

Thank you

Chisaa Onyekachi Igbolekwu (PhD)
