Review of: "Are Tobacco Companies in Nigeria Complying With Health Warning Label Regulations on Cigarettes and Other Tobacco Products?"

Oluwatobi Adegbile¹

1. East Tennessee State University, United States

Excellent and thorough work by the authors. Different sections of the manuscript (introduction, methods, results, discussion, and conclusion) were thoughtfully crafted and align with the overall objectives of the study. Despite being a descriptive study, the methods and findings were elaborately documented, and manuscript formatting surpasses the current publication benchmarks for a descriptive study. The data collection strategy is innovative; however, a more robust analytic strategy across multiple states in Nigeria should be considered for future work.
