Intraductal Prostate Carcinoma

National Cancer Institute

Source

National Cancer Institute. *Intraductal Prostate Carcinoma*. NCI Thesaurus. Code C161022.

An intra-acinar and/or intraductal neoplastic epithelial proliferation in the prostate gland that has some features of high-grade prostatic intraepithelial neoplasia but exhibits much greater architectural and/or cytological atypia, typically associated with high-grade, high-stage prostate carcinoma. (WHO 2016)
