# Bladder Exstrophy

National Cancer Institute

## Source

National Cancer Institute. *Bladder Exstrophy*. NCI Thesaurus. Code C123207.

A congenital anomaly that involves the protrusion of the exstrophied bladder through the abdominal wall. It is an anomaly that exists along the exstrophy- epispadias complex, which frequently includes urethra exstrophy, separation of the pubic symphysis, external rotation of the pelvic bones, and opening of the puborectal sling and sphincters.
