Dear Authors, congratulation on your manuscript. This very timely in doing this kind of research. To make it more meaningful, your manuscript needs a bit improvements. Here is some suggestion for the improvements

1. The title and content do not match. Although the title of the article refers to Malaysian SMEs. There is no/lack of information on the current state of adoption of digital technologies in Malaysian SMEs. What is the current state in terms of the digital transformation of SMEs in Malaysia?
2. No clear methodology used in the research. This research has not been able to use a methodology that is in accordance with the requirements of academic research
3. The originality or novelty of this research, has not been pointed out by this study.
4. The figures must be clear. Improve the quality of the figures.
5. Lack of explanation about what is the present and future of the SMEs in Malaysia. The literature is not used in the framework of Malaysia data.
6. Insufficient availability of previous studies as references for academic research may result in significant gaps that deviate from the intended research objectives.
7. The discussion and conclusions presented in this research do not sufficiently address the research objectives initially set forth by the researcher. It is recommended to separate the discussion section from the conclusion section.
8. Thank you for bringing this issue.
