Potential competing interests: No potential competing interests to declare.

The following should be noted and corrected accordingly:

1. How practicable is your proposed model in real time?
2. Is it cost-efficient?
3. Grammar requires minor re-editing.
4. What are the main contributions of the study?
5. The Introduction should contain the organization of the study.
6. Section 2 should be a literature review or survey.
7. What is the future scope of the study?
8. Consider this related paper "PFDI: a precise fruit disease identification model based on context data fusion with faster-CNN in an edge computing environment " for better comprehension.
