

Review of: "Approximate Relationships to Reproduce the Values of Shell Correction Energy for Fission Fragments"

Rajendra Prasad Gorrey

Potential competing interests: No potential competing interests to declare.

It's a nice initiative to obtain the values of the shell correction energy for fission products of ^{232}Th , ^{235}U , ^{238}U , $^{239-240}\text{Pu}$, and ^{252}Cf . It would be nice if the linear relations proposed were plotted over the actual data. This helps to know whether the data wanted is within the accuracy limits one needs. Reframing of the sentences can improve readability.
