

# Review of: "Digital Literacy Skills of Teachers: A Study on ICT Use and Purposes"

Deniz Mertkan Gezgin<sup>1</sup>

<sup>1</sup> Trakya University

**Potential competing interests:** No potential competing interests to declare.

First of all, the study, which is handled in terms of digital inadequacies and digital divide, includes determinations as a situation analysis. But it contains some shortcomings.

- \* Country and city name can be given in the title. This is written in the restrictions. The title can be changed to private, not public.
- \* The introduction is too long. It should be shortened.
- \* The method of the study should be written as "Descriptive study".
- \* How were the survey questions prepared? Have you had an expert opinion?
- \* When was the data collected? Was a criterion used when selecting participants?
- \* More practical suggestions should be given. course etc.
- \* Emphasis should be placed on government policies.
- \* The conclusion part should be expanded a little more in these respects.

Kind Regards,

Assoc.Prof. Dr. Deniz Mertkan Gezgin
