Potential competing interests: No potential competing interests to declare.

A very good article pertaining the use of centrifuges. Has good command on subject, engaging and well-articulated. Some things to consider:

- Might include fewer keywords, preferably up to five
- Use newer citations (2015–present) and very few old citations, if necessary
- Perhaps make a table of comparison for conventional method of balancing and proposed newer methods to emphasize the better solution or lack thereof

Good luck!
