

# Review of: "Factors Associated with Outcomes of Status Disclosure among Antiretroviral Therapy (ART) Attendees in Public Health Facilities of Mekelle City, Tigray, Ethiopia"

Syed Sharaf Shah

Potential competing interests: No potential competing interests to declare.

## Title

It's too long , lengthy title draws away attention of reader from important points.

## Introduction

Old data of 2017 is included in the introduction Please provide updated data

Clearly describe General and Specific objectives of your study

Acknowledge the work of other researchers on the topic and identify the gaps in knowledge which your study will fill

## Methodology

### Study population

Your study participants include People living with HIV who have declared their HIV status to someone

Why those PLHIV , who didn't disclose their HIV status to others are not included , this might have introduced bias in the study ,please explain

Sampling frame

Describe sampling , from which sample of 273 was drawn

Results

Summarize findings of your study in one paragraph , according to the objectives of the study

Present key findings of your study in logical sequence without interpretation

Discussion

Discuss, main findings of your study , compare the results of your study with similar studies conducted by other researchers

What theses results mean ? Please explain

Ethical concerns

How confidentiality and privacy of study participants was maintained ?

How informed consent was obtained ?

How the study participants were compensated for their time and effort ?
