Potential competing interests: No potential competing interests to declare.

Authors should add a comparative table of 1G,2G and 3G of CPTED on the basis of common key features.

Related work / Literature review to be added that either before the existing study done over CPTED on the basis of presenting some use cases or scenarios; if yes as author have used statement "The methodology involves triangulation of a literature review of 3<sup>rd</sup> Generation CPTED" so the comparison of existing scenario discuss in this paper must be correlated with that.

It would be better if authors can add some open research challenges for specially 3rd Generation of CPTED which provides a researchers community a gateway for the improvements.

Authors must add following citations:
