Cicletanine Hydrochloride

National Cancer Institute

Source

National Cancer Institute. *Cicletanine Hydrochloride*. NCI Thesaurus. Code C101534.

The hydrochloride salt of a dihydropyridine derivative with diuretic and antihypertensive activity. Cicletanine exerts thiazide-like diuretic activity. In addition, this agent inhibits protein kinase C (PKC) and is able to reverse vasoconstriction through the inhibition of PKC-mediated inhibition of Na/K-ATPase phosphorylation.
