Calcium Polycarbophil

National Cancer Institute

Source

National Cancer Institute. *Calcium Polycarbophil*. NCI Thesaurus. Code C28902.

A loosely cross-linked synthetic polycarboxylic-type hydrophilic polymer resin, laxative and anti-diarrheal Calcium Polycarbophil increases stool frequency, fecal water content, and fecal weight in a dose-dependent manner. It is used for idiopathic constipation, secretory diarrhea, and irritable bowel syndrome. (NCI04)
