Girentuximab

National Cancer Institute

Source

National Cancer Institute. *Girentuximab*. NCI Thesaurus. Code C1960.

A chimeric monoclonal antibody directed against G250, a cell surface antigen found in the majority of renal cell carcinomas. Following binding, monoclonal antibody G250 (mAb G250) may be internalized by G250 antigen-expressing renal carcinoma cells; mAb G250 may be useful as a carrier for radioisotopes and other antineoplastic therapeutic agents. (NCI05)
