Potential competing interests: No potential competing interests to declare.

It was a nice report from less studies area and important country. But there is no graphic results in this paper, there is no table. You explained everything in a text format but it's boring for readers. So, I suggest that prepare results in a figure or table format. Then in your discussion part, you again repeat your results. I think this paper can not publish in this format and it needs a precise revision. Also, a native English speaker should edit and review the text of paper.
