The article "The Longitudinal Mean Arterial Pressure among congestive heart failure patients" is nicely described by the authors. The abstract shows the detailed description of the article. However the authors are suggested to go through the following suggestions and incorporate in the revised script.

The author mentioned in the introduction part as the aim of this study was to identify the determinants of longitudinal MAP among chronic heart failure patients treated at Felege Hiwot Referral Hospital from January 2016 to December 2019. Anyhow it is suggested to mention why it is limited till 2019. What about the 2020, 2021, 2022 and 2023 data?

A background study can be added after introduction section.

In Data processing the missing value size is not mentioned.

Description on Table 4 needed.

A comparative study table can be added before conclusion

There are no recent cited articles found. All the references are before 2019.
