

Review of: "Covid-19 vaccine uptake and its associated factors among rural households in The Gambia: a community-based cross-sectional study"

Rajesh Kumar

Potential competing interests: No potential competing interests to declare.

Well, it is interesting to see such a good piece of work on the vaccination drive during the coronavirus outbreak. I must attract the attention of the author to many published works from other corners of the globe which equally did a tremendously good job. I suggest including those works to complement this work.
