Neurogenic Differentiation Factor 1-Associated Monogenic Diabetes

National Cancer Institute

Source

National Cancer Institute. *Neurogenic Differentiation Factor 1-Associated Monogenic Diabetes*. NCI Thesaurus. Code C129745.

Monogenic diabetes caused by inactivating mutation(s) in the gene NEUROD1, encoding neurogenic differentiation 1. In addition to diabetes, this condition may be associated with neurogenic anomalies. Homozygous NEUROD1 mutations result in permanent neonatal diabetes.
