Moxalactam Disodium

National Cancer Institute

Source

National Cancer Institute. *Moxalactam Disodium*. NCI Thesaurus. Code C66207.

A parenteral oxacephem antibiotic with an oxygen molecule substituted for the sulfur atom in the beta-lactam nucleus. Moxalactam is a third-generation cephalosporin that has broad-spectrum antibiotic activity and high resistance to beta-lactamases. This agent is active against gram-negative enteric bacilli, including multiple drug-resistant strains.
